ENERGY CONSERVATION IN THE WORKPLACE

In business the use of electricity, oil and gas will in general make up your total energy spend. Depending on the type of business, there will be variations between these energy sources. Monitoring and management of electricity, oil and gas on site is very achievable once you know how. You should endeavour to monitor usage by taking regular meter readings, comparing use with production or turnover and monitoring invoices.

CAOMHNÚ FUINNIMH SAN ÁIT OIBRE

De ghnáth, i ngnólacht, is úsáid leictreachais, ola agus gás a dhéanfaidh suas an caiteachas iomlán ar fhuinneamh. Beidh éagsúlachtaí i gceist idir na foinsí fuinnimh sin ag brath ar an gcineál gnólachta. Tá sé thar a bheith indéanta monatóireacht agus bainistiú a dhéanamh ar leictreachas, ola agus gás. Ba chóir duit monatóireacht agus comparáid rialta a dhéanamh, ar d'úsáid agus do shonraisc.
